New Myers Stainless Steel Self-Primer Sewage and Trash Pumps

Myers is pleased to announce the release of 3" and 4", 316 stainless steel and stainless steel fitted, self-priming sewage and trash pumps. This new offering extends the offering of Myers self-priming pumps and opens new opportunities in the industrial markets.

- Stainless steel pumps employ 316 stainless steel components in all instances where exposed to the fluid being pumped.

Stainless steel fitted pumps include 316 stainless steel impellers, lip plates, and wear plates.

If your customers are dealing with corrosive pumping applications, installing the use of a Myers stainless steel self-priming pump may prevent early failure.

Model: MSPD4SS

You can depend on Myers self-primer pumps to provide years of reliable service. Thousands of units are operating trouble-free throughout the world.

CORROSION RESISTANCE

Myers ANSI 316 stainless steel self-primers are designed for extreme pumping applications where traditional materials won't last.

ECONOMICAL

Myers self-primers are designed for economical long-term operation. You'll find a number of unique features to make service and maintenance quick and easy. Quick and easy service means you'll reduce downtime and save money.

EASY INSTALLATION AND START-UP

You mount the Myers self-primer on top of the wet well or sump and drop the piping into the wet well. Connect piping, fill the case with water, power up and you're running. When you turn the pump on, it automatically primes. The flap check valve retains the prime in the pump and suction leg to give you worry-free operation.

SAVE MONEY WITH PEAK PERFORMANCE

External adjustment allows you to easily maintain original operating efficiency and peak performance. By simply turning the external cap screws you easily adjust the clearance between the impeller and wear plate. You can make the external adjustment without disturbing the piping system. You don't have to disassemble the pump and piping. For more information visit www.mecbequip.com or email sales@mecbequip.com
